

6 NOV 1974

MEMORANDUM FOR: Deputy Director of Security (P&M)

SUBJECT : SRD Work Measurement Data

1. Attached is a copy of the SRD work measurement statistical report for FY 1975 covering the period through 31 October 1974.

2. Comparing the statistics with those of October 1973 reveals notable decreases in microfiche, computer support and compartmented information activities.

3. The sizable decrease in microfiche activities cannot be considered significant as the number of man years assigned to that activity has been reduced from nine (9) to six (6).

4. The notable decreases in computer support and compartmented information activities is not a real drop in activity at all but a return to a normal case load following the heavy purging and key punching in October 1973 of a special code word clearance.

5. Other activities show minor increases or decreases, however, no significance is attached to these trends at this time.
